PRESS RELEASE

October 22, 2018

ENGINEERING EXPLORERS PROGRAM KICKS-OFF ANOTHER YEAR

McMillen Engineering Inc. and Penn State Fayette, The Eberly Campus kicked-off their annual Engineering Explorer Post program on October 16, 2018. The program is offered through the Boy Scouts of America to introduce high school students to the field of engineering with the hope of encouraging future generations of engineers.

The initial meeting took place at Penn State Fayette, The Eberly Campus to introduce the program and distribute the schedule to the students and their parents. Subsequent meetings will be held at various local businesses to offer first-hand insight into each discipline. “Allowing the students to experience various engineering processes helps them to understand the array of possibilities available in the engineering field. In most cases, the students aren’t aware that these facilities and types of jobs are available in Fayette County,” said Terry McMillen, Sr.

“Over the years we have taken the Explorers to places most people will never see. It is very rewarding to see them get excited about the opportunities and to watch them complete their education,” said David Meredith, Associate Professor of Engineering at Penn State Fayette, The Eberly Campus.

Anyone interested in learning more about the program can visit www.mcmilleng.com/engineering-explorers-post or contact McMillen Engineering Inc. at 724.439.8110.

McMillen Engineering Inc. is a full-service civil engineering and land surveying firm located in the Fayette County Business Park in Uniontown, South Union Township, Fayette County, Pennsylvania. For more information visit mcmilleng.com.

“It is the mission of McMillen Engineering, Inc. to contribute toward the advancement of the civil engineering and land surveying fields by providing quality engineering, surveying and technical services to our clients in an efficient manner while promoting a work environment that offers opportunities for our employees to thrive both professionally and personally.”
